Education

Pune Institute of Computer Technology

Bachelor of Engineering in Computer Engineering

CGPA: 9.04

July 2021 - June 2025

Sushiladevi Junior College

12th Maharashtra State Board

Percentage: 93.83

June 2019 - July 2021

Experience

Principal Global Services

January 2025 - April 2025

Trainee Intern

- Designed and implemented scalable ETL pipelines Leveraging **PySpark** to process **more than 10K** records daily, performing data validation and transformation on SQL databases with **95.9%** data accuracy and integrity.
- Built a responsive web application using **React.js** with efficient component structure, state management, and API integration to enhance user experience and functionality across devices.
- Utilized **AWS** services such as **S3**, **EC2**, and **CloudWatch** for deploying and monitoring applications, contributing to a more resilient cloud-based infrastructure.

Siemens DISW

June 2024 - July 2024

Software Developer Intern

- Developed and deployed a comprehensive **HR-Interview-Feedback application** using **Mendix**, effectively coordinating with cross-functional teams to ensure project success.
- Streamlined candidate evaluation process, reduced feedback turnaround time by **40%**, enhancing recruitment efficiency.
- Designed application components and services using **Angular** to enhance user functionalities.
- Performed unit testing for Angular components with **Jasmine** and **Karma**, ensuring reliability and maintaining code quality through test-driven development.

RhythmFlows Solutions

September 2023 - January 2024

Full Stack Developer Intern

- Led and engineered robust **Multi-Tenant** projects that interconnected **over 20** distinct **Postgres** databases within a single application framework with **Django**, **Angular**, and **PostgreSQL**.
- Achieved a **23%** reduction in **query computational time** which improved overall system performance.
- Developed over 25 REST APIs built on **Django REST Framework**, enhancing system efficiency and achieving **40%** faster resolution time through behavioral pattern refactoring.
- Optimized backend performance by replacing inefficient ORM queries with **optimized SQL queries**, significantly improving database responsiveness and overall system performance by **20%**.

Projects

StatusQuo ([Link](#)) | *NEXT, NodeJS, Fast API, MongoDB, Cloudinary, Octokit*

March 2024 - May 2024

- Created StatusQuo, a **Git-AI** Project Manager that analyzes over 5 GitHub repositories, improving task tracking efficiency by **40%** and providing real-time analytics of tasks.
- Architected a suggestion system for **issues** and **PRs**, reducing manual review time by **30%** for developers.
- Implemented a **Llama-based-chatbot** that aids developers and non-tech users in understanding code and project status and automated **documentation**, cutting creation time by **50%**.

MedEzz ([Link](#)) | *Flutter, NodeJS, ExpressJS, WebRTC, MongoDB*

January 2024 - February 2024

- Created MedEzz, a platform delivering personalized **medication reminders** with **health and engagement scores** across **12 tracked parameters**, enhancing patient engagement and health monitoring.
- Integrated **Google Fit** for syncing chat and appointment bookings, supporting over **more than 150** users, developed a **GPT-4** powered chatbot using LangChain, and enabling doctor monitoring with detailed analytics reports.

Technical Skills

- Programming Languages:** C++, Java, Python, SQL, JavaScript, TypeScript, HTML, CSS
- Frameworks & Technologies:** Django, Flask, FastAPI, Angular, React, Git, Postman, Node.js, Express.js
- Databases:** MySQL, PostgreSQL, MongoDB, SQLite
- DevOps & Cloud:** AWS (EC2, S3, CloudWatch), Docker, GitHub Actions, CI/CD

Achievements

- Solved **more than 800** problems across various coding platforms, including **LeetCode** (Knight) and **Codeforces** (Pupil), ranking among the **top 3%** on LeetCode.
- Runner-up** in the Techfista International Hackathon (May 2023), collaborating with teammates to develop an innovative solution among **90 teams**.
